Subject
ERB evaluation

Upon request of Dr. Helle Larsen, researcher at the Department of Psychology (UvA), the Ethics Review Board of the Faculty of Social and Behavioural Sciences, University of Amsterdam, The Netherlands, hereby attests that the research project entitled the “*Inclusion of a Parental Component to a Sports-Based HIV Prevention Program for Dominican Youth*” was not submitted for ethical approval but can be regarded as ‘standard research’. This implies that it fully complies with the guidelines for standard research in the Faculty: participants are free to stop participation without any personal consequence, there is no deception, data are anonymous and privacy is guaranteed, there was no risk of any kind involved in participation in this research. Furthermore, for this study fully informed consent for all participants and active parental consent was obtained.

Sincerely,

Wery P.M. van den Wildenberg, PhD
